| 2020.12.10 |         | David, Roberts ICICS Technical Manager & LST Coordinator | 3.4 Spatial Analysis: Occupancy limits, floor space, and traffic flows: As recommended by the Dean’s Office in the Faculty of Applied Science, ICICS will use a QR code for check-in/out of the building in order  
  - QR code for sign-in and sign-out:  
    o Sign in captures name, date and time, department. When they answer “arriving”, the self-assessment for COVID-19 symptoms is imbedded in this survey.  
    o When they answer “departing”, name, date as well as a list of primary rooms they have been in will be included. No self-assessment required at exit.  
  *There may be reason for exemptions to accommodate systems for shared buildings.*  
  - ICICS will complete compliance checks (can be random) to ensure the 2/3 occupancy is not exceeded  
  3.5 Worker Screening: ICICS will ensure that the check-in & check-out QR code (provided by the Dean’s Office) is posted on the entrance doors of the ICICS building (where possible). The survey will have the questions from [Thrive BC Self-Assessment Tool](#).  
  3.6 Prohibited Worker Tracking: The QR code Qualtrics survey database will have the information if someone who tried to access a building has COVID-19 symptoms. | Robert Rahling |
COVID-19 Child (Workspace) Plan

This workspace safety plan will assist faculty and staff who wish to resume academic activities including the services that **directly** support teaching & learning, as well as revenue generating activities. This plan will include a review of activities to be undertaken in the workspace to ensure effective controls are in place to prevent the spread of COVID-19. The applicants are responsible for ensuring this document reflects current government guidance and notices which can be found, along with information about UBC’s response to the pandemic at [https://covid19.ubc.ca/](https://covid19.ubc.ca/).

This plan must be reviewed by your Local Safety Team, and signed by your Unit Head/Director.

Introduction to Your Operation

1. Scope and Rationale for Opening

There will be two postdocs who will need access to the Blockchain@UBC rooms (Room 179 and 188)

**Mohamad-Jaafar NEHME:** The reason behind my request to resume work attending the ICICS building is the need for a space where I can concentrate on my work. Roughly speaking, my small home, composed of two rooms and inhabited by six persons, it is almost impossible to make research. As we
bypassed the first stage of reopening, I feel like it is the time to make the move. What encourages me to get back is having my own office desk at ICICS which is two meters apart from every other fellow, so that we can both keep safe. **I will only use room 179 a few times every week during the following times Monday to Thursday from 9:00AM to 5:00PM.**

Mohammad Jalalzai: I am instructor for the course EECE 571C. I teach the course through Zoom. My internet at home is not very stable. Therefore to provide uninterrupted lectures for students I need to come to UBC to give my lectures as the internet here is more stable and I can also use the white board to better explain different concepts to students. **I will need to use Room 188 for internet access to teach EECE571C only on Fridays from 9:00AM to 12:00PM.**

[The following is a list of the different documents Safety and Risk Services asks you to review while developing your plan. Please read them and leave them here to indicate you have consulted them.]

## Section #1 – Regulatory Context

### 3. Provincial and Sector-Specific Guidance

- BC's Restart Plan: “Next Steps to move BC through the pandemic”
- BC COVID-19 Self Assessment Tool

### 4. WorkSafeBC Guidance

- COVID-19 and returning to safe operation - Phases 2 & 3
- WorkSafeBC COVID-19 Safety Plan
- WorkSafeBC: Designing Effective Barriers
- WorkSafeBC: Entry Check for Workers
- WorkSafeBC: Entry Check for Visitors
- WorkSafeBC Protocol: Offices
- WorkSafeBC Protocols: Post-Secondary Education

### 5. UBC Guidance

- COVID-19 Campus Rules
- Guidelines for Preparing for Reoccupancy
- Guidelines for Safe Washroom Reoccupancy
- Space Analysis and Reoccupancy Planning Tool
- UBC Employee COVID-19 PPE Guidance
- Ordering Critical Personal Protective Equipment
- UBC Employee COVID-19 Use of Shared UBC Vehicles Guidance
- UBC Facilities COVID-19 website - Service Level Information
- UBC Employees COVID-19 Essential In-person Meetings/Trainings Guidance
- Workplace Physical distancing Planning Tool and Signage Kit
- Preventing COVID-19 Infection in the Workplace training course
- UBC Cleaning Standards & Recommendations for Supplementary Cleaning
- UBC Classroom Safety Planning
- UBC Signage
Section #2 - Risk Assessment

The below information is intended to serve as a guide for risk assessment and the planning of mitigation strategies. Activities are considered **high risk for COVID-19** if they meet **any three** risk considerations below. Your plan will be reviewed by your LST; they will consider both high and low risk activities as this will determine additional approval requirements (APSC Dean’s Office, Central UBC, etc.). Please note, the risk assessment is done **before** the risk mitigations are in place.

<table>
<thead>
<tr>
<th>Risk Consideration</th>
<th>Context</th>
<th>Important Risk Mitigation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Risk #1</strong> – public facing units (interactions with 10+ people who are not your regular colleagues)</td>
<td>The risk of COVID-19 introduction and spread is presumed to be greater as the number of contacts increases</td>
<td>– Enable two metre physical distancing; pinch-points must be addressed and carefully managed. – Use of plexiglass barriers wherever possible – Reduction of high touch points or increased cleaning – Use of cohort groups, where appropriate – Enable and encourage increased hand hygiene – Strict non-admittance to anyone with symptoms</td>
</tr>
<tr>
<td><strong>Risk #2</strong> – Prolonged close interaction with others (not in the usual cohort of colleagues); if contact lasts for more than 15 minutes</td>
<td>Person-to-person spread is more likely with prolonged contact</td>
<td>– Enable two metre physical distancing – Reduction of high touch points or increased cleaning – Enable and encourage increased hand hygiene – Strict non-admittance to anyone with symptoms</td>
</tr>
<tr>
<td><strong>Risk #3</strong> – The workplace or activity is indoors and windows cannot be opened (e.g., some classroom and meeting spaces)</td>
<td>A confined indoor space is presumed to have greater risk</td>
<td>– Enable two metre physical distancing – Reduction of high touch points or increased cleaning – Enable and encourage increased hand hygiene</td>
</tr>
</tbody>
</table>
### COVID-19 Child Plan Blockchain

| Risk #4 – Employees/students/visitors have frequent contact with high-touch surfaces | A higher frequency of contact with high-touch surfaces (e.g., service counters, card payment machines) is presumed to have greater risk | – Enable two metre physical distancing  
– Use of plexiglass barriers wherever possible  
– Reduction of high touch points or increased cleaning  
– Enable and encourage increased hand hygiene  
– Strict non-admittance to anyone with symptoms |
|---|---|---|
| **Risk #5** – The activity involves people who are at higher risk of severe illness (i.e., older adults or those with chronic health conditions) | COVID-19 can cause more severe illness among people who are 65 and over, and those who have compromised immune systems or other underlying medical conditions | – Work with HR for individual accommodations  
– Encourage work from home arrangements  
– Enable two metre physical distancing  
– Reduction of high touch points or increased cleaning  
– Enable and encourage increased hand hygiene  
– Strict non-admittance to anyone with symptoms |
| **Risk #6** – The activity involves people who are not able to follow hygiene practices such as washing hands frequently, and identifying when they are feeling ill and staying home (e.g., Childcare Facilities, summer day camps) | COVID-19 spread can occur when personal preventive practices are not consistently followed. For example, young children are less likely to be able to carry out these practices | – Reduction of high touch points or increased cleaning  
– Strict non-admittance to anyone with symptoms  
– Limiting of non-essential contacts in space  
– Strict non-admittance to anyone with symptoms |

Risks will be considered in accordance with [https://srs.ubc.ca/covid-19/safety-planning/determining-safety-plan-risk/](https://srs.ubc.ca/covid-19/safety-planning/determining-safety-plan-risk/). Applicable risk factors may be subject to change based on COVID-19 developments and Campus operations, and will be addressed as part of required monitoring.

#### 2.1. Risk # Associated to your Activity
List below the Risk # associated to your activity and give a brief description as to why. Activities are considered high risk if they meet 3 or more risks of the categories for risk consideration BEFORE mitigations are in place.

The risk associated to our two postdoctoral researchers’ return to the building would be Risk #3 – The workplace or activity is indoors and windows cannot be opened.

Room 179 and 188 are both indoors. Room 179 has a window that can be opened and Room 188 does not have windows for air ventilation. Although room 188 doesn’t have a window, it shouldn’t be a problem as only one postdoc, Mohammad Jalalzai, will access this lab.

Also, the postdocs will use their own computer and equipment, hence there won’t be high touch points.

2.2. Hazard Identification
Describe the type of contact (close/distant) and duration of the contact (brief/prolonged) under COVID operations - where do people congregate; what job tasks require close proximity; what surfaces are touched often; what tools, machinery, and equipment do people come into contact with during work.

There won’t be any contact as the two postdocs won’t be required to work in the office or lab during the same time. Mohammad Jalalzai will only be in room 188 on Fridays and will be off campus for the rest of his work weeks while Mohamad Nehme Jaafar will be in room 179 when he needs to be on campus.

Aside from the door knob and light switch, there wouldn’t be any surfaces that will be touched often. We will also have the two postdocs disinfect surfaces before they leave the office or lab.

2.3. Pre-COVID vs. Post-COVID Occupancy and Contact list
Provide actual numbers and percentage of its normal capacity. Please fill out the excel spreadsheet “contact list template” to list the names and the contact details of the approved persons to come back on campus. This contact list should be sent to the LST chair or co-chair. They will update a master contact list stored on SharePoint. This is important to have that list up-to-date in case of Contact Tracing.

Pre-COVID- No one works in room 179 as it is a communal office space for a few postdocs who mostly drop by for meetings or short office hours, there are two shared work desks in the office. Room 188 can fit, roughly 5 to 6 people and there are roughly five to 6 work desks in the lab.

Post-COVID- We anticipate only one person will occupy one room each, we will also only allow one person per room at a time.

2.4. Confirm that you have discussed each employee’s comfort level with returning to work and have addressed any concerns, or will require further assistance in doing so. Any worker (staff, students, faculty, post docs, research associates, technicians and other research personnel) who has concerns about returning to work on campus can request an exemption to his/her supervisor.

Yes, confirmed. We discussed about our plan and their comfort level during a staff meeting.

2.5. Employee Input/Involvement
Detail how you have met the MANDATORY requirement to involve frontline workers, Joint Occupational Health and Safety Committees (JOHSC), and/or Local Safety Teams (LST) in identifying risks and protocols as part of this plan.
The administrator, Michelle Ho, has attended the town hall meetings on research curtailment and resumption as well as ICICS Weekly staff meetings for updates on return to Research. Michelle Ho and the two postdocs, Mohammad Jalalzai and Mohamad Jaafar Nehme, has read all COVID-19 related guidelines published on the UBC website. To identify strategies to mitigate risks, Michelle will consult with the Return to Research team when needed.

The plan was presented to faculty and staff, at a weekly staff meeting on September 15th for questions and feedback. We will also provide updates on this current revised child plan on the new template during the staff meeting on October 20th.

### 2.6. Worker Health

Detail how all Supervisors have been notified on appropriate Workplace Health measures and support available and how they will communicate these to employees. [https://wellbeing.ubc.ca/wellbeing-campaigns-and-initiatives/thrive](https://wellbeing.ubc.ca/wellbeing-campaigns-and-initiatives/thrive)

All supervisors have been informed on appropriate Workplace Health measures and supports for mental and physical health, to be made available as they return to campus. Check in’s and supports will also be made available via the following channels:

- Weekly team meetings (virtual)
- Team email broadcasts
- One-on-one meetings with direct supervisors
- JOHSC meetings & communications

Supervisors are encouraged to disseminate information from [UBC Wellbeing](https://wellbeing.ubc.ca/wellbeing-campaigns-and-initiatives/thrive).

### 2.7. Plan Publication

Describe how you will publish your plan ONLINE and post in HARD COPY at your workplace for employees and for others that may need to attend site.

Final Plans will be emailed to individuals requesting access to ICICS 179 and 188. A digital copy of the plan will be posted to the ICICS Website and a hard copy will be posted on the door of 179 and 188.

### Section #3 – Hazard Elimination or Physical Distancing

Coronavirus is transmitted through contaminated droplets that are spread by coughing or sneezing, or by contact with contaminated hands, surfaces or objects. UBC’s goal is to minimize COVID-19 transmission by following the safety hierarchy of controls in eliminating this risk, as below.
The following general practices shall be applied for all UBC buildings and workspaces:

- Where possible, workers are instructed to work from home.
- Anybody who has travelled internationally, been in contact with a clinically confirmed case of COVID-19 or is experiencing “flu like” symptoms must stay at home.
- All staff are aware that they must maintain a physical distance of at least 2 meters from each other at all times.
- Do not touch your eyes/nose/mouth with unwashed hands.
- When you sneeze or cough, cover your mouth and nose with a disposable tissue or the crease of your elbow, and then wash your hands.
- All staff are aware of proper handwashing and sanitizing procedures for their workspace.
- Supervisors and managers must ensure large events/gatherings (> 50 people in a single space) are avoided.
- All staff wearing non-medical masks are aware of the risks and limitations of the face covering they have chosen to wear or have been provided to protect against the transmission of COVID-19. See SRS website for further information.

3.1. Work from Home/Remote Work
Detail how/which workers can/will continue to work from home (WFH); this is required where it is feasible

Work From Home:
The entire Blockchain@UBC team will continue to work remotely except for Mohammad-Jaafar Nehme and Mohammad Jalalzai.

Return to Research on Campus:
Mohammad Jalalzai only needs access to Room 188’s lab space for net connection to teach EECE571C, he will only be on campus during teaching times (Friday 9:00AM to Noon).
Mohamad Jaafar Nehme will be on campus, in room 179, several times per week only during scheduled times (Monday to Thursday 9:00AM to 5:00PM) to conduct research as no other space is available at home.

### 3.2. Work and room schedule

If you need to use a SHARED space, give the name of the person responsible of room booking in each building you plan on entering.

Michelle Ho is responsible for any bookings for room 179 and 188, Gable will have access to room bookings on Google Calendar and through text.

Room 188 is a shared space with other departments, while none of the professors or postdocs will be working in the lab, Mohammad Jalalzai will share our Child Plan with those professors or postdocs. Mohammad Jalalzai will be in touch with those professors and postdocs if they find the need to use the room as well.

For now, only Mohammad Jalalzai is scheduled to use room 188 on Fridays while Mohamad Jaafar Nehme will use room 179 three to four times a week, it was communicated to Mohamad that he will not be in the building on Friday.

### 3.3. Working alone procedure

Discuss your working alone procedures and how they will be adapted for this Child plan

Mohammad Jalalzai will work alone in room 188 and Mohamad Jaafar Nehme will work alone in room 179. They both work on their laptops and won’t require to use any equipment (aside for internet connection), hence they will sanitize the table they work at and door knob when they leave the lab/room.

Working Alone Procedures will be followed and can be found here, http://safety.mech.ubc.ca/procedures/working-alone-procedures/

### 3.4. Spatial Analysis: Occupancy limits, floor space, and traffic flows

APSC recognizes that some workspaces are dynamic environments and it may be challenging to adhere to physical distancing guidelines. Nonetheless, controls must be in place to keep personnel spaced at least 2m apart at all times. Clear communication of this to employees, monitoring of implementation, in addition to physical controls (signage) are needed.

As such: Using floor plans and/or photographs of your lab/workspace:

1) Identify and list the rooms and **maximum occupancy** for each workspace/area explaining your methodology for determining occupancy;

2) Illustrate a 2 metres radius circle around stationary workspaces/benches/instruments and common areas or equivalent approach to social distancing; and

3) Illustrate one-way directional traffic flows

### Laboratory/Office Considerations

Occupancy limits will also be posted on the door of each room by the PI or office administrator.

**Building/Facility Considerations**

Common areas (lunchrooms, lounges, study space, admin, teaching spaces, bathrooms, elevators)
• All rooms will be sign-posted with the maximum occupancy based on available floor space to allow for 2m physical distancing.
• Busy or tight stairwells must be marked for ascending or descending between floors (this will not apply in an emergency, such as a fire).
• Elevators should only be used for heavy loads and accessibility needs; limited to either 1 or 2 occupants, based on elevator size, with appropriate signage.
• Place tape or markings on the ground to indicate where workers should stand while lining up to enter the elevator. Ensure adequate space is provided for those exiting the elevator.
• Staff and faculty using the campus during stage 2 should not expect to be able to use common areas like shared kitchens for food preparation or consumption, and should make arrangements accordingly.
• Where kitchens or lunchrooms are open, a hand washing station (i.e. sink) must be available; Personnel must bring their own dishes.
• When common office machines or appliances are used (e.g., copier, microwave, refrigerator, kettles) they must be wiped down by the user with disinfectant prior to and following use.
• Chairs and desks in lunchrooms / lounges / study spaces / administration areas (e.g., main office) must be spaced far enough apart to allow for physical distancing.
• Where possible, doors to multi-person washrooms should be propped open to minimize high touch surfaces and maximize air flow. Where possible, only one person should use the washroom at a time. Occupied/unoccupied door signage should be used or light on/off system must be indicated.
• Main offices may be open where necessary to support research and teaching, but the number of people working should be very limited and always accommodating physical distancing.
• Where a feature/service leads to formation of a line-up (e.g., coffee machine, machine shops, access to Stores), markings spaced 2m apart should be on the floor.

Points of Access to Building and Access Control
• Access to the buildings is provided using key cards and the buildings will remain locked until further notice. The now designated ‘exit doors only’ should have their fob deactivated by UBC Secure Access to prevent entry through these doors.
• To minimize high touch surfaces, interior doors that can be safely propped open without violating fire codes, should be propped open.

Signage and Directional Guides
• Elevators (maximum of either 1 or 2 occupants, based on elevator size).
• Stairwells that are busy or very tight (for directionality).
• Physical distancing signage must be posted at entrances and/or hallways.
• Narrow hallways should be designated one-way with appropriate signage on the floor and at eye level.
• There must be a Worker/Visitor Entry Check sign at every entrance that describes the symptoms of COVID-19 and other self-declaration items, and prohibits entry for any personnel that may meet one of the three criteria.
• Post signage within the units to inform of the measures in place.
  - Signs for 2 Meter Social Distancing will be posted near room and lab entrances
  - Protocol of 2 meter social distancing and traffic flow patterns will be marked out on the floor with the tape provide

**Hand Sanitizer Stations**
- Hand washing/sanitizing stations should be considered inside of building entrances, subject to availability.
- Hand sanitizers should be considered near the entrance to all shared labs/multi-user facilities (to be provided by PI or facility manager), subject to availability.
- Hand sanitizing stations should be considered at locations where propping the doors interferes with a building’s airflow/temp stability subject to availability.
  - **Hand Sanitizing Stations will be available upon entering room 179 and room 188 right by the entrance**, there will be a sign for occupant(s) to sanitize before entering the room

**Offices**
- Temporary short access to offices (e.g. 10 minutes for grabbing a book) will be provided by ICICS Director’s approval on a case-by-case basis.
- Not withstanding the requirement that all work that can be done effectively from home must remain remote, use of graduate student/trainee offices can be allowed, but must accommodate physical distancing protocol. Priority will be given to offices that are required for teaching purposes.

**Shared Facilities**
- Access to some facilities will be restricted to appointments made by email (e.g., machine shop, Stores), others will require online scheduling.
- All shared tools, computer keyboards, and other high-contact areas must be wiped down with disinfectant prior to and following use.
- If required, visits to the workplace to deliver samples (e.g., industrial partners) should be prearranged, staggered, and safety protocols should be communicated before entry into the workplace (e.g., email and/or signage posted to entrance). Keep a record of visitors to the workplace.
- Users MUST comply with procedures or access/services will be denied.

### 3.5. Worker Screening
Describe how you will screen workers: 1) exhibiting symptoms of the common cold, influenza or gastrointestinal; 2) to ensure self-isolation if returning to Canada from international travel; and 3) to ensure self-isolation if clinical or confirmed COVID-19 case in household or as medically advised

- While ICICS is not using the the QR-Based system of building access. Those granted access to the building are required to take the [Self-Assessment quiz](#) and determined not to have symptoms of COVID-19
  - Reminders to do so will be posted at each external entrance.
- Every person (employee, visitor, contractor, etc.) returning on campus (also the employees working remotely) will do the [SRS training](#).
To complete the SRS training, if the person does not have a CWL, a temporary one can be hosted by the Department/School/Unit through UBC IT.

Before coming to work, all personnel must check their health status.
- Personnel experiencing any symptoms of COVID-19 (cough, sneezing, shortness of breath, loss of sense of smell/taste, sore throat, tiredness, fever) must not come to work.

Individuals displaying symptoms of COVID-19 must remain at home and isolated until they have been confirmed COVID-free by testing or have been symptom free for the length of time recommended by the BCCDC.
- Personnel who have been in contact with a person confirmed or presumed to have COVID-19 must also self-isolate as per provincial health guidelines. Personnel will be referred to the BC Health Self-Assessment Tool to determine if they require testing and/or medical care.

Anyone returning from outside of Canada must follow the directions of the quarantine act, which specifies 14 days of self-isolation, regardless of whether or not they are experiencing COVID-19 symptoms.
- Anyone exposed to a traveler must also self-isolate for 14 days. Supervisors cannot give personnel in quarantine work that would require them to break the quarantine.

Every front and back entry door will include signage for both workers and visitors/guests that prohibits entry if any of the above criteria apply. The signage will either copy, or will directly use the signage below:
- UBC Entry Check Sign
- WorkSafe: Entry Check for Workers
- WorkSafe: Entry Check for Visitors

### 3.6. Prohibited Worker Tracking
Describe how you will track and communicate with workers who meet categories above for worker screenings

We will only be allowing Mohammad Jalalzai and Mohamad Jaafar Nehme to use room 179 and room 188, they are to keep us updated if there is any need to revise current Child Plan arrangements. They will be tracked through regular email correspondence and updates. We will also be communicating during Blockchain@UBC Weekly Staff meetings every Tuesday. Mohammad Jalalzai and Mohamad Jaafar Nehme will inform their supervisor by email is not feeling well. They will decide if they want to take a sick day or work remotely if possible. If they decide to take a sick day, they will enter the request onto the Workday system of follow the procedure for their unit.

### Section #4 – Engineering Controls

#### 4.1. Cleaning and Hygiene
Detail the cleaning and hygiene regimen required to be completed by the user for common areas/surfaces (Custodial has limitations on cleaning frequency, etc.).
Outline specific cleaning processes and schedule for high-touch equipment, specialized/sensitive equipment or other unique circumstances to your lab/workspace. Detail how and what types of cleaning products and disposal options you will provide. If possible, include cleaning stations/infrastructure on your lab photos/plan.

- Personnel must wash their hands regularly and avoid contact with one another.
  - Hand washing/sanitizing stations should be considered inside of building entrances, at locations near shared spaces, and at locations where propping the doors interferes with a building’s airflow/temp stability, subject to availability.
- The standard UBC custodial standards will apply. Custodial crews will clean the common areas of buildings outside of operation hours (after 7 PM).
  - If there is any additional required cleaning (e.g. high-touch surfaces) the protocols and cleaning solutions must be provided. Any laboratory cleaning will follow the WHO guidelines for decontamination.
- Post docs using office and lab space will wipe down used surfaces and doorknobs with disinfectant wipes.
- Each person should wash his hands once he arrives at the office, on his leave and regularly. A sanitizer is to be put on the room entrance.

4.2. Equipment Removal/Sanitation
Detail your appropriate removal of unnecessary tools/equipment/access to areas and/or adequate sanitation for items that must be shared that may elevate risk of transmission, both activity-related (i.e. instruments, tools) and general (i.e. coffee makers in break rooms)

The rooms (179 and 188) will not have any tools or equipment to share, postdocs will bring in their own laptops and will not be using anything else in the rooms.

There will only be one person in one room at a time. The occupant of the room will also wipe down surfaces before they leave.

4.3. Partitions or Plexiglass installation
Describe any needs for safety infrastructure i.e. physical barriers, plexiglass installation required for your lab/workspace and if possible include them on your photos/room plan.

Since these postdocs do not receive reviewers or interact with others, we see no need for any plexiglass or partitioning barriers.

Section #5 – Administrative Controls

5.1. Training Strategy for Employees
Detail how you will mandate, track and confirm that all employees (including the ones who continue to work remotely) successfully complete the Preventing COVID-19 Infection in the Workplace online training; further detail how you will confirm employee orientation to your specific safety plan.

- The SRS Preventing COVID-19 Infection in the Workplace online training course is mandatory for all employees (including those who remain working remotely).
- The SRS course link, the ‘Return to Campus Activity Commitment Form’ (please see Appendix1) as well as a list of all documents required for reading ahead of returning to campus (i.e.
building safety plans, and their specific Workspace safety plans) must be sent by email to all workers.
• A copy of the completed course certificate and a signed ‘Return to Campus Activity Commitment Form’ must be returned to the Department/School designate, Gable Yeung.

5.2. Communication Strategy for Employees
Describe how employees may raise concerns and how you will address these, and how you will document all of this information exchange

Communication of the Plan to Employees
• To communicate the risk of exposure to COVID-19 in the workplace to the employees, Blockchain@UBC will disseminate this Child plan via e-mail and will post it as hard copy on the door to the workspace.

Communication of Worker’s Concerns
• When an employee is concerned about any of these policies, they should follow the standard WorkSafeBC reporting guidelines (see Right to Refuse Unsafe Work).
• They may also contact their worker representative of the APSC JOHSC to express their concerns.

5.3. Signage
Detail the type of signage you will utilize and how it will be placed (e.g. floor decals denoting one-way walkways and doors) ‘cleanliness state’ of equipment/instruments, hand-washing guidance. Please see signage templates on Safety & Risk Services COVID-19 website and Worksafe’s COVID-19 – Resources

Blockchain@UBC will utilize the signage from the Safety & Risk Services COVID-19 website, and the WorkSafe’s COVID-19 – Resources website, WorkSafe BC, and from Building Operations.

Required Signage:
• Signs that state the maximum occupancy of common rooms
• Non-Medical mask required
• Handwashing
• Entrance/exit only signs
• Use of tape to block-off rooms and classrooms that are off-limits
• Use of tape and floor signage to direct traffic through high flow areas
• Signs to remind people to adhere to physical distancing guidelines
• Floor signs to mark of 2 m spaces where people might line up (if needed)
• Signed Access Agreement on lab doors indicating maximum occupancy

Checklist of items that require disinfection at the end of each shift. This should include switches, freezer / fridge handles, keyboards and mice of communal computers, cart handles, etc.

[Helpful Tip: Building Operations has sent out approved floor tape and decals to all of Departments/Schools. If you need more of these items, please ask your unit’s building administrator to contact the Zone Facilities Manager.]

5.4. Emergency Procedures
The applicant must ensure that all employees entering the lab should be aware of the Building Emergency Response Plan (BERP) and have access to it. If applicable, detail your strategy to amend your lab’s emergency response plan procedures during COVID-19.

It is expected that all individuals (Staff, faculty, researchers, team members) entering the lab are aware of the ICICS Building Emergency Response Plan and the guideline for handling Covid-19 from the SRS. They will have access to both. If there was a confirmed positive incident, SRS would defer to the government response protocols and rely on their direction. UBC would provide assistance as requested.

5.5. Monitoring/Updating COVID-19 Safety Plan
Describe how you will monitor your workplace (supervisor, departmental safety representative, other) and update your plans as needed; plan must remain valid and updated for next 12-18 months

- The workspace plan will be reviewed every 3 months.
- The following items would trigger an off cycle review:
  - Request by Safety and Risk Services
  - Moving to higher building occupancy
  - Second wave of COVID-19
  - Shift in provincial guidelines
  - Or incidence of COVID-19 infections
- Michelle Ho will check the compliance as well as the LSTs for the periodic review.

5.6. Addressing Risks from Previous Closure
Describe how you will address the following since the closure: staff changes/turnover; worker roles change; any new necessary training (e.g. new protocols); and training on new equipment

- If a change to the worker role becomes necessary for continued operation, training in the new protocols of the job must be included (including full documentation of the training).
- If the worker role changes, the details must be included in either the PI or office admin site-specific safety plan.
- Gable Yeung will be notified of changes to staff schedules or any new arrangements in room 179 or room 188

Section #6 – Personal Protective Equipment (PPE)

6.1. Personal Protective Equipment
Describe what appropriate PPE you will utilize and how you will/continue to procure the PPE

[Additional info required: Does your workspace require any additional PPE requirements? If no, please state this. If yes, what is your strategy for additional PPE procurement? Please only discuss PPE, and not sanitation supplies or non-medical masks]

Not Applicable, postdocs will only use non-medical masks and sanitation supplies.
## Section #7 – Non-Medical Masks

### 7.1. Non-Medical Masks (New)

Describe your plan to inform faculty and staff on the wearing of non-medical masks

- See [Using Non-Medical Masks](#) website for the most up to date information
- Effective September 16, 2020 UBC implemented a policy whereby students, faculty, staff and visitors are required to wear non-medical masks in common indoor spaces on campus.
  - Office spaces:
    - Non-medical masks are not required when working in a sole occupant office or enclosed room.
    - In individually assigned cubicles in open concept workspaces that have been designated to ensure they are 2m apart or have appropriate physical barriers: while occupying an assigned workspace, users have the option to remove their non-medical mask when seated or while engaged in activities where the physical distancing requirement is met.
    - Non-medical masks are not required in internal office hallways that have been designated as one way, yield to others, or able to meet physical distancing requirements.
  - Labs / workshops:
    - Non-medical masks are not required when working in a sole occupant lab / workshop or enclosed room.
    - In lab spaces / workshops that have been designated to ensure occupants are working 2m apart or have appropriate physical barriers: users have the option to remove their non-medical mask while engaged in activities where the physical distancing requirement is met.
  - Classrooms:
    - Faculty and instructors are not required to wear a non-medical mask in classrooms while physically distanced (2m) from students and other classroom users.
    - In classrooms where capacities have been reduced so that designated seats are 2m apart: students and other classroom users have the option to remove their
As per UBC’s policy, non-medical masks must be worn:
• When travelling through building corridors and shared spaces;
• While entering or exiting research spaces or while moving from an assigned research location;
• While entering or exiting classrooms;
• Within classrooms while moving to a seat;
• Any other time that 2m physical distancing cannot be maintained

Section #8 - Acknowledgement

8.1. Acknowledgement
Plan must demonstrate approval by Administrative Head of Unit, confirming: 1) the Safety Plan will be shared with staff and how; 2) staff will acknowledged receipt and will comply with the Safety Plan.

I confirm that this Safety Plan has been shared with all team members who will be accessing this space both through email and will be made available as a shared document.

Postdocs will provide an email confirmation that they have received, read and understood the contents of the plan.

Appendices

- [APSC specifically requests photographs of your current workspace layout, as well as your proposed usage layout i.e. where people will work, what areas will be closed off, where signage will be placed, etc. If floor plans are available, please append these as well.]
- Please attach any maps, pictures, departmental policies or risk assessments applicable UBC Guidance documents, where necessary, and other regulatory requirements referred to in document.]
Appendix 1 – Return to Campus Activity Commitment Form

Building requirements for conduct related specifically to COVID-19 safety have been developed for the ICICS building in general and workspace in particular. The building guidelines have been co-developed by the LST co-chairs from ICICS. **All students, staff and faculty** who are permitted to resume activities in the *ICICS* building are required to complete the following requirements. Send completed form to your supervisor or his/her designate. PIs then send all completed forms and certificates to Gable Yeung access@icics.ubc.ca.

Your name: ______________________  Date: ________

Faculty/Dept. ____________  Primary room: _______

Your role (faculty, staff, grad student, etc.): ___________________

Supervisor name: ________________

Your signature: ________________

By your signature you agree that you intend to meet the requirements/principles for:

- Doing the daily building check-in and check-out (QR code access)
- Practices for protecting against getting COVID-19 (stay home if ill; avoid touching your face; wash hands frequently; physical distancing > 2 m)
- No building access unless authorized by the schedule set up by the supervisor
- Knowing the guidelines for entry/exit to/from the building and getting around it
- Accessing washrooms and photocopy room
- Eating guidelines
- Cleaning and disinfecting commonly touched surfaces and shared equipment/tools
- Knowing who to contact for safety and interpersonal concerns/problems
- Abide by your unit’s working alone policy
- Building evacuation procedures in case of emergency
- What to do if someone shows signs of respiratory illness
- Consequences of not following requirements and rules
